

Testimonials:

A truly amazing product. I have been using the same Gillette Mach III Turbo blades-clip for over 6 months now and it is still as sharp and smooth shave as the first day that i used it. Ra-zor Slide Pro is a winner both with shaving comfort and quality, while saving you over \$300 on replacement blades. An honest miracle invention!s.

Abraham G.

A sharp razor makes all the difference in my shower. No more skin irritation and what I like also is that I can easely stowe away the Razor in the practical Wall attachment that comes with the Razor Slide Pro. Try it today you will like it too.

Nena Z.

I love that idea! It's completely genius! One thing that i completely hate about razors is that the men's razors do a better shave job than the women's, so I always buy the men's. And they're slightly cheaper. It's so frustrating.

Destiny M.

Remove micro-burrs, dirt and anything that stands between you and your sharp razor blade. Enjoy a smooth shave every day.

A Breakthrough in Disposable Razor Blade Sharpening Allows Consumers to Save Money, Protect our Environment & Enjoy a Smooth Shave Everyday

Imagine enjoying a smooth shave everyday while saving money and protecting our environment?

Now you can!

ZOR Enterprises Corporation from Abbotsford, British Columbia is proud to introduce the Ra-zor Slide Pro; a revolutionary breakthrough in disposable razor blade sharpening technology.

It will allow consumers to keep the razors sharp for a very long time, save a junk of money while protecting our environment.

The Ra-zor Slide Pro makes sharpening disposable razor blades, which become dull after only a few uses, fast & easy. Its patented Swiss precision technology assures a sharper razor blade and smoother shave for up to 6 months.

According to Roger Zullig the company's president, over 2 billion razor blades are deposited into landfills every year.

The Ra-zor Slide Pro will allow users to reuse their blades over and over and thereby reducing the damage to our environment. In addition, it will save the average blade shaver, a man or a woman, \$400.00 per year in shaving cost."

The Ra-zor Slide Pro was a concept that began 7 years ago.

As Roger explained, "when I first began to think about the design of the Ra-zor Slide Pro I had both men & women in mind. I wanted to design a device that was small, efficient and would fit comfortably in the users hand." He continued, "because the product would be used in the shower, over the bathtub or near the sink attached to tiles or mirrors, I needed to find material that would be self lubricating and could sharpen the blade in both dry or wet conditions while protecting the crucial gliding strips at the same time".

Fortunately he was able to overcome both of these design obstacles and with that extend the durability of the razors dramatically.

Currently, his product is being marketed to households across North America, but Zullig sees a day in the not too distant future where it's marketed worldwide with every 2nd household having a Ra-zor Slide Pro in their bathroom.

For more information on this revolutionary product please visit the company's website at <https://ra-zor.com>

Ra-zor Slide Pro works with most 3 blade razors. It being a precision tool, the best results are achieved with the Mach III Series of Razors and the new Razor Blue 3.
